Untamed Mind of Christ

An Introduction to Nature Based Authenticity and Wholeness for Christians and Religious Professionals

August 14 -16, 2015

The Untamed Mind of Christ is a highly experiential wilderness immersion designed to help Christian men encounter, explore and embody the four facets of our innate human wholeness, the image of God, the Christ nature, in our journey to becoming fully human.

The Untamed Mind of Christ

Based on a deeper exploration of Jesus in the Gospels and Bill Plotkin's new book, *Wild Mind: A Field Guide to the Human Psyche*, this 3 day immersion is an experiential descent into our human psyches as unique expressions of the story and pattern of Christ, the shape and rhythm of whom reveals the hidden treasure that we each carry as a gift to embody in the church for the world - a world desperately longing for the authentic and transformative contributions of visionary leaders, sacred priests, and social prophets of cultural renaissance.

As "deep calls out to deep," so the wilds of outer nature mirror our own inner nature. Our own wild nature has been created with astonishing resources, unrealized gifts and depths that most of us might not know exist until we discover how to access, cultivate, and integrate them into our daily lives.
